INVENTORY CONTROL MANAGER (Orlando, FL)

John Bean Technologies Corporation and its predecessor companies have a long history of technical innovation. JBT traces its roots to 1884 when inventor John Bean developed a new type of spray pump to combat San Jose scale in California's orchards.

Today, JBT Corporation's AeroTech Division is a world leader in the supply of airport equipment and services focused on the future. At our Orlando, Florida facility we manufacture airport ground support equipment, including aircraft deicers, aircraft tow tractors, cargo loaders and transporters.

As an **Inventory Control Manager** with JBT AeroTech, you will be responsible for managing inventory levels and the receipt, custody, control and distribution of materials. Major areas of responsibility include service parts pull pack and ship, receiving, stockroom, and cycle counting. This function will work in conjunction with Tactical and Strategic Sourcing Function, Business Planning Function, and Manufacturing Management. This position is also in charge of setting strategic and operational inventory management goals, tracking progress on same goals and reporting progress to senior management.

Additional duties and responsibilities include . . .

- Establish and maintain inventory levels to ensure continued production throughput while maximizing inventory turns.
- Safeguard the business unit's investment in inventory and protect against inventory obsolescence.
- Identify problems and develop creative solutions within a deadline driven customer focused environment is necessary for success.
- Lead and manage people of varying skill sets and capabilities. Must be able to work well with both executive-level personnel and the employees performing the daily warehouse and purchasing functions.

Supervisor Responsibilities: Group Team Leads and 15 to 20 indirects.

Scope of Responsibility: Approximately \$60 Million USD Inventory annual consumption with 3-6 turns.

Relocation assistance is available.

ABOUT JBT AEROTECH

We believe that work should be fun as well as challenging. That's why the company offers the best of both worlds -- the growth potential of a company with a developing technology that is unique in its field, plus a competitive benefits package and frequent company-sponsored events.
