Annual Shipments \$100 million
Inventory \$7 million
Direct Reports 8

Nature and Scope

The position has the responsibility for leading the supply side portion of the S+OP process and is Responsible for division wide inventory objectives.

The position reports to the Director, Operations. The Supply Chain Manager position is responsible for Distribution, finished goods and raw material buying, requirements planning, inventory management, and Production planning and scheduling.

The candidate must possess a good working knowledge of manufacturing processes, and plant Organizations. It is necessary that the incumbent have a strong knowledge of state of the art production Planning, inventory management, and production forecasting techniques and their interdependencies in Supporting our inventory utilization and delivery performance objectives.

The candidate will work very closely with our manufacturing operations and lead plant purchasing teams to ensure that our inventory management and production planning techniques are understood, performed Consistently throughout our operations, and continuously improved. Responsibilities include ensuring That the procedures are in place to implement the appropriate MRP system planning parameters, such that these parameters reflect our overall inventory and product availability strategy. Responsibilities also Include directing the necessary operations' team members to review actual inventory, delivery, and Production performance to our objectives and jointly develop and implement the necessary Improvements.

The position requires close coordination with our Information Technology team to ensure that our Business system incorporates and supports the necessary techniques, processes, and performance Reporting required.

Position:

The candidate will coordinate and lead the administration of our inventory product classification and Rationalization processes with our Sales and Marketing teams. A strong understanding of our customers' logistical requirements and the objectives of our Sales and Marketing teams is required.

The position will be responsible for identifying and implementing the training and education for team Members involved with the purchasing and production planning, inventory management, and product Classification and rationalization processes.
